DETAILED ACTION

Information Disclosure Statement

1. The information Disclosure Statements received on 06/10/02, 06/19/02 and 8/21/02 have been received and the initialed copies (three copies) of the IDSs are attached with this correspondence.

Applicant indicated in his correspondence of March 21, 2003 that there is an attached "International Search report" with the letter, however, there is no PTO 1449 with neither the cited International search report nor the copy of the search report received by the Office.

Specification

2. The disclosure is objected to because of the following informalities: the US Patent Application number in page 10, line 21 should include the serial number of the application.

Appropriate correction is required.

Claim Objections

3. Claims 4-17 are objected to because of the following informalities:

"A first set of channel estimate" in claim 4, line 11 should be amended to read as---the first set of channel estimate. See line 3 for the first occurance of "first set of channel estimate." The same is true with "a first set of channel estimate" in claims 7 and 14.

Art Unit: 2631

"The first phase estimate" in claim 8, line 8 should be amended to read as ---the first phase offset---.

Claims 5-6,8-13 and 15-17 are inherently objected as being dependent on the objected base claims

Appropriate correction is required.

Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 5. Claims 4-17 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claimed "determining the set of complex channel estimate based on the phase offset and the first set of channel estimate" in claims 4,7 and 14 is not disclosed as how the complex channel estimate is determined from the phase offset and the first channel estimate. Other than what is disclosed in page 19 with respect to figure 5 step 408, there is no mention in the disclosure as how the phase offset and the first channel estimate are used to generate the complex channel estimates.
- 6. Claims 5-6,8-13 and 15-17 are inherently rejected as being dependent on the rejected base claims.

Art Unit: 2631

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

8. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Salonen et al. (US 6,611,675).

Salonen et al. (Salonen hereinafter) teaches a spread spectrum communication system for communicating broadband signal between the User Equipment (UE) and Base Unit (BU) (see fig. 1) wherein the UE comprising: receiving date over a common pilot channel and dedicated pilot channel from the BU; estimating the channel using both of the pilot channels; and measuring the phase offset from the estimated channels as in claims 1-3. See col. 4, lines 16-68 and figs 2A and 2B.

Art Unit: 2631

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tesfaldet Bocure whose telephone number is (571) 272-3015. The examiner can normally be reached on Mon-Thur (7:30a-5:00p) & Mon.-Fri (7:30a-5:00p).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mohammad H. Ghayour can be reached on (571) 272-3021. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
